Recovering from Wildfire and Managing Fuels October 2020

Post-fire Soil Safety October 17

Are you or someone you know growing food on a property impacted by wildfire? Fire introduces new considerations for growing produce and raising backyard poultry. In this free virtual webinar, learn from scientists who have studied urban wildfires in California, including: what questions to ask, how to improve soil health and make informed decisions about food safety, which agencies might have helpful information, and what remains unknown in this burgeoning field of study.

This webinar is intended for individuals on properties that directly burned in terms of soil considerations for growing food post fire, but it will also include

Grazing to Reduce Fuels

Professional grazing of overgrown rangelands, pastures and parcels is proven to reduce the spread of dangerous and costly wildfires.

Do you have land but no livestock and feel concerned about fire fuels on your property? Or are you a livestock owner that can provide a grazing service and/or need land and forage for your animals? [Match.Graze](#) can help.

Match.Graze is a free online platform connecting landowners statewide who want grazing animals to livestock owners with animals that can provide vegetation management services, created by UC Cooperative Extension.

brief updates on the research regarding produce safety and backyard chicken eggs.

Free Virtual Webinar

Saturday, Oct 17, 2020

9:30 am - 11:30 am

Register at ucanr.edu/postfiresoilsafety.

From small semi-rural communities to large open spaces, grazing can provide an affordable solution to the inevitable accumulation of fire fuels. Grazing can be more cost-effective for reducing fuels on landscapes that are too steep, rocky, or remote for mowing or chemical treatment, or in the wildland-urban interface where burning is not an option.

We are dedicated to improving the quality of life of Californians by developing and delivering research-based information in agriculture and natural resources, and by supporting healthy families and communities.

Facebook Website

We have excellent resources on many subjects, including growing vegetables and fruit trees, how to address pests of the home and garden, range and forest management, and curriculum for 4-H projects.
