## Tree Care and Volunteer Month

April 2021

### Tree planting classes

Are you inspired to plant trees as part of Earth Day or Arbor Day celebrations? If so, how can you help ensure their success after planting?

UCCE is hosting five one-hour sessions during April and May on Thursdays from 12:30-1:30 p.m. to help give guidance and best practices in tree selection, where and how to plant a tree, and details on pruning, feeding, watering, and pest management. All tree enthusiasts are welcome.

Planting is just the first step in the life of a tree. "As trees grow and begin to fill their space in gardens, landscapes, parks or city streets, they begin to require other kinds of care," shared Jim

### Volunteer Appreciation Month

We appreciate the [4-H](#) and [Master Food Preserver](#) volunteers who provide extraordinary service to Humboldt and Del Norte communities. Their local events, projects, and social media posts demonstrate that volunteers make a powerful difference and help create healthy and vibrant communities.

With a 3:1 volunteer to youth ratio in 4-H, volunteers believe in guiding and supporting our youth to stay connected, build competence, develop character, care for living things and resources, and contribute to the world. Our Master Food Preserver (MFP) have similar aspirations and share their knowledge and skills with safe and delicious food

Downer, the UC instructor of the program.

preservation throughout our communities.

Registration and details about the program can be found at this [link](#). More information about tree care and selection can be found [here](#).

Please join us in celebrating National Volunteer Month and help us thank our 4-H and MFP volunteers.

We are dedicated to improving the quality of life of Californians by developing and delivering research-based information in agriculture and natural resources, and by supporting healthy families and communities.

Facebook Website

We have excellent resources on many subjects, including growing vegetables and fruit trees, how to address pests of the home and garden, range and forest management, and curriculum for 4-H projects.
