**Water Measurements and Fire**

**May 2018**

## **Water Measurement and Reporting Course: SB-88 Compliance**

Anyone who is currently using or diverting surface water from a stream, pond, or spring is invited to a workshop on Friday June 29th from 8:00-11:00 a.m. in Eureka to learn the newest water diversion requirements. Senate Bill 88 requires that all persons whom divert or plan to divert (including stock ponds) more than 10 acre-feet of surface water/year, to measure and report the water they use.

## **Humboldt County: The First Prescribed Burn Association in CA**

Landowners, volunteer fire departments, and other interested community members are invited to join the Humboldt County Prescribed Burn Association. What is a prescribed burn association? It is a collection of ranchers/land managers/fire fighters/neighbors pooling their resources, sharing their labor and knowledge, and safely conducting prescribed burns.

Goals of this workshop are to: 1) clarify reporting requirements, 2) identify appropriate measurement systems for your property and diversion strategy, and 3) gain certification in volume calculations and reporting. By attending this workshop participants can meet the requirements to become a qualified individual when installing and maintaining measurement devices and/or implementing measurement techniques.

Pre-registration is required and available at this [site](#). Cost: \$25 and includes materials and a certificate. For more information please see the [Workshop Flyer](#).

We here at UCCE have been working toward this goal over the past year and have successfully assisted with 6 landowner burns in the past 12 months here in Humboldt County. Now that an equipment trailer has been assembled, and the formal association formed, we are ready to get more good fire on the ground to meet fuel reduction and land management objectives.

If you are interested in learning more, burning, and/or joining the Humboldt County Prescribed burn association, please call 707-445-7351 or [email](#) Lenya (Fire Advisor).

**We are dedicated to improving the quality of life of Californians by developing and delivering research-based information in agriculture and natural resources, and by supporting healthy families and communities.**

Facebook Website

**We have excellent resources on many subjects, including growing vegetables and fruit trees, how to address pests of the home and garden, range and forest management and curriculum for 4-H projects.**
