Plants & Pets and Forest Stewardship

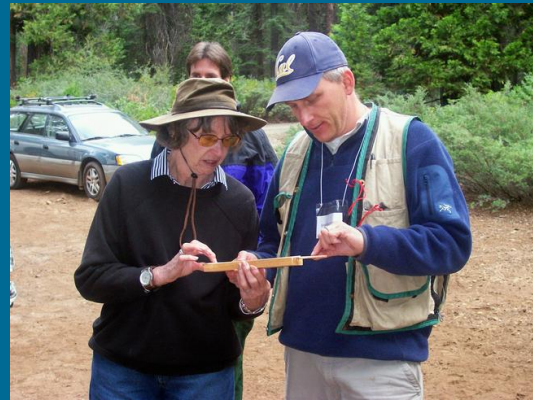

March 2021

Poisonous Plants & Pets, March 6

Do you know what plants in your home and garden are toxic to your pets? There are many common plants and flowers that can cause various reactions to certain animals (and people) ranging from mild stomach disorders to even death.

Join UCCE Master Gardener Kelley Gelderman, retired DVM, as she speaks on this subject. Kelley retired in 2017 and 33 years of small animal practice and now is an active Master Gardener in San Joaquin County. Combining her knowledge of animal medicine and horticulture, this will be a presentation you do not want to miss.

Forest Stewardship Series 3/2-5/27

Have you ever wanted to know more about forest stewardship? Forest landowners are invited to a workshop series to:

- 1) learn how to improve and steward their forest lands
- 2) to network with professionals and other landowners.

The workshop will include on-line and field training in developing management plans, forest restoration, fuels reduction, project development and permitting, and cost-share opportunities. Attendees who complete the whole course will be eligible for a free site visit from a CA Registered Professional Forester.

Free Online Webinar

*The Dark Side of Plants: Poisonous
Plants and Pets*

Saturday, March 6, 2021
10:00 am - 11:30 am

We are dedicated to improving the quality of life of Californians
by developing and delivering research-based information in
agriculture and natural resources,
and by supporting healthy families and communities.

Facebook Website

We have excellent resources on many subjects, including
growing vegetables and fruit trees, how to address pests of the home and
garden, range and forest management, and curriculum for 4-H projects.
